Tp link Archer T2U Plus wifi adapter install on linux

#wifi #linux

Installing Tp link Archer T2U Plus adapter RTL8821AU WiFi Driver on Linux

Install Correct Driver

1. Clone the repository:

```
git clone https://github.com/morrownr/8821au-20210708.git
cd 8821au-20210708
```

1. Install build dependencies (for Ubuntu/Debian):

```
sudo apt-get install -y dkms bc build-essential git
```

1. Run installation script:

```
sudo ./install-driver.sh
```

1. Reboot system:

```
sudo reboot
```

Troubleshooting

If WiFi networks aren't showing after reboot, check:

1. Verify adapter is recognized:

```
lsusb
```

Look for "TP-Link" in the output.

1. Check if interface is up:

```
iwconfig
```

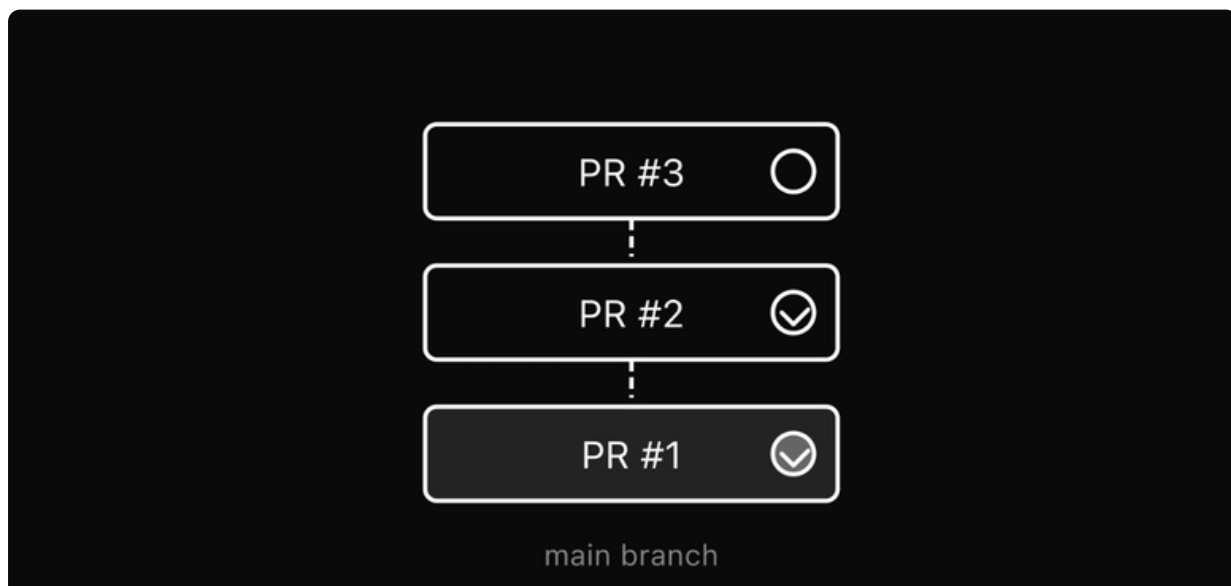

If issues persist, additional troubleshooting may be needed.

TOKEN VAULT

```
npx configure-auth0-token-vault
Auth0 Token Vault Setup

Auth0 CLI detected

Connected to tenant: *****@*****.com

How would you like to configure the application?
  Create a new application

Enter application name
  Token vault app

Select application type
  Regular web app

Application Created: Token Vault App

Using application: Token Vault App (*****)

Application configured for Token Vault

Connection loaded

Select connection to enable for Token Vault:
  google-oauth2

google-oauth2 configured for Token Vault

Which Token Vault configuration do you need?
  ☒ Connected accounts (via my account API)
  ☐ Refresh Token Exchange
  ☐ Access Token Exchange
  ☐ Privileged Worker Token Exchange
```
